SUMMARY

Computer Science student at University of Missouri-St. Louis with experience in Python, Java, and C#. Passionate about software development and game design, with hands-on experience building projects in Unity and web development. Seeking a software engineering or IT internship to apply programming skills and contribute to real-world applications.

EDUCATION

Bachelor's in Computer Science , University of Missouri-St. Louis	Present
Associate Degree in General Studies , Saint Louis Community College	Dec '24

SKILLS

Languages Python, Java, C#, C++, JavaScript, HTML, CSS, R
Frameworks/Tools Unity, Git, GitHub, VS Code
Concepts Time Management, Adaptability, Teamwork, Problem-Solving, Quick Learner

PROJECTS

Unity Asteroid Shooter Game

- Developed a 2D game using C# and Unity with player controls, enemy spawning, and collision systems
- Implemented scripts such as PlayerController, BulletController, and GameController
- Improved gameplay responsiveness and performance through script optimization

3D Isometric Roguelike Game

- Built a Unity 3D isometric roguelike using C# with player combat, enemy AI, projectile systems, and game progression
- Implemented object pooling, animation-driven combat, and modular gameplay architecture for scalable development
- Designed low-poly environments and responsive combat inspired by Hades and Curse of the Dead Gods

Smart Home Energy Management System

- Java based smart home system to monitor and optimize household energy consumption using smart appliances and energy sensors
- Implemented OOP principles including inheritance, abstraction, polymorphism, and strategy design patterns for modular system design

Lexical Analyzer Implementation

- Developed a lexical analyzer in C++ to scan source code and break input streams into meaningful tokens such as keywords, identifiers, operators, literals, and delimiters

Personal Portfolio Website

- Built using HTML, CSS, and JavaScript
- Showcases projects and GitHub repositories

Local LLM Automation Assistant

Present

- Integrated local large language models (LLMs) through Ollama API for offline AI functionality
- Designed modular architecture for future support of voice commands, persistent memory, and automation workflows

EXPERIENCE

Shift Lead

Nov '21 — Dec '23

Penn Station East Coast Subs

- Supervised and trained 5+ new team members, improving onboarding efficiency and team productivity
- Handled cash, reconciled registers, and ensured accurate transactions
- Improved workflow efficiency by reorganizing prep area, reducing service time by 10%

Crew Member

May '21 — Present

Raising Cane's Chicken Fingers

- Delivered excellent customer service in a fast-paced environment
- Collaborated with team members to meet peak-hour demands and maintain high service quality
- Recognized as Employee of the Quarter for outstanding reliability and teamwork

Shift Lead

Aug '19 — Apr '21

TACO BELL

- Managed shift operations, ensuring team productivity and adherence to safety standards
- Trained staff on POS systems and order accuracy, improving customer satisfaction scores
- Resolved customer concerns quickly and effectively
